

M-Board

What is M-Board?

Well that is an excellent question and we will try to give a good definition.

It is a Magnesium - Based Panel Material that is: heat resistant, fire resistant, has extreme stiffness, is a super durable, waterproof board that can be used as sheathing on the outside of your building envelope and It can be used as a drywall for your finished office or equipment room areas.

Anywhere that water or mildew could be a concern, you should consider M-Board.
