THE AXIOM

The AXIOM is available with or without an equipment room or as a tunnel only.

The equipment room may be integral (within the structure) or attached to the exterior of the structure ("L Shaped Design).

The AXIOM features a primary 2 story "Tower" that can house multiple offices, restrooms, storage etc.

The building provides many signage opportunities i.e. graphic wraps, channel letters, neon etc.

The structure is our offset curve design in which one sidewall is taller than the other placing emphasis on the tunnel.

This structure is highly customizable.

The AXIOM is our flagship design and features several automobile dealership ques including acm body panels, curved building elements, and plenty of modern appeal. The Tower features a full 2 story space for offices / restrooms etc. The Tunnel is our offset curve design similar to the 518e.

The AXIOM incorporates a wrap around sign fascia and many surfaces for signage and branding.

- * Impressive Design
- * Unique Modern Automotive Aesthetic
- * Distinctive Curved Roof Styling
- * Available with Multiple Tower Elements
- * Offset Curve Design
- * Highly Adaptable

THE AXIOM

The structure features our swooping curve design in which one sidewall is much taller than the other placing emphasis on the tunnel. This structure is highly customizable.

The METROCURVE 550e is one of our custom special "curved roof" designs that makes a bold, modern innovative statement.

It features a "monolithic wall" as well as a distinctive "Rocket Fin" design element on the columns, as well as an exaggerated curved roof fascia.

The building is available in a standard or two story design.

- * Very Bold Distinctive Design
- * Unique Modern Automotive Aesthetic
- * Rocket Fin Design Elements
- * Available with Sign Monolith
- * Swooping Curve Design
- * Highly Adaptable

METROCURVE 550€

CUSTOM

The Client had a very restrictive site, so it was necessary to have a second level for the equipment room. This was no problem for our building system as it is designed to handle heavy structural loads making our building system even more value oriented. Make use of tight site locations as well as irregular lay-outs.

The MODERNWASH building system is designed to be easily customized. The model shown is an example of the MODERNWASH adaptive qualities. This model is a design provided by **URBANARCH Architecture Firm of Memphis TN**. We worked closely with their firm to adapt their vision into an economical building system. The various steel and glass panels make for a highly distinctive and affordable design. The use of the profile steel panels conveys a very modern aesthetic.

- * Unique Steel Panel Design
- * Economic Use of Exterior Panels
- * Economic Mono Slope Roof
- * Glass and Steel Combination
- * Second Floor Equipment Room Option
- * Highly Adaptable
